HÆMANTHUS KALBREYERI.

HÆMANTHUS KALBREYERI.

A magnificent species from the West Coast of Africa. Its showy inflorescence is of immense size, a single head often producing upwards of a hundred of its attractive flowers, which are of a bright reddish vermilion colour. The filaments are brightly coloured, while the golden anthers have a pretty effect in contrast with the mass of glowing colour. 3*s.* 6*d.* and 5*s.* each.

LILIUM NEILGHERRENSE.

LILIUM NEILGHERRENSE.

A magnificent Lily, one of the finest of its section; the blossoms are creamy white, deliciously fragrant, and nearly a foot long; it is of free growth, and admirably adapted for conservatory decoration. *3s. 6d., 5s.* and *7s. 6d.* *See also page* 15.

ONLY BULBS OF THE FINEST QUALITY ARE SUPPLIED.

CHOICE GLADIOLUS (Hybrids of Gandavensis).

This beautiful tribe of plants should be largely planted everywhere, because—

They are perfectly hardy and easily grown.
They are gorgeously beautiful.
Their handsome spikes of flowers are useful for decorating vases and epergnes.
Their flower buds expand and last a long time when cut and placed in water.
They are charming when introduced into borders among Evergreens.
Planted by hundreds among Rhododendrons, they brighten and enliven the beds during the summer and autumn months.

Orders for the above are booked throughout the year at the following prices, and the bulbs supplied in January, February or March.

SPIRÆA ASTILBOIDES.

One of the most handsome of hardy herbaceous perennials, and one which has been certificated both by the Royal Horticultural and Royal Botanic Societies on account of its great merit. The stems are furnished with triternate leaves, and terminated by compound feathery branches of elegant white flowers. It will be a charming and indispensable plant for pot culture as a decorative object in the early spring months, on account of its free growth and beautiful flowers, which are produced in the greatest profusion. This is one of the Twelve New Plants with which Mr. W. B. gained the First Prize at the Great Show of the Royal Horticultural Society, held at Kensington, in 1882. 10*s.* 6*d.*

SPIRÆA (HOTEIA) JAPONICA.

Cannot be too highly appreciated as a decorative plant for early forcing, its pretty erect shining green foliage, surmounted by numerous beautiful and graceful panicles of white inflorescence, giving the whole plant an elegant appearance, and rendering it at once most pleasing and useful for decorative purposes.

Strong imported clumps, 6s. and 9s. per dozen.

SPIRÆA PALMATA.

The bright pink Spiræa, one of the most beautiful hardy plants in cultivation, producing lovely broad corymbs of pink flowers. It is a native of Japan. 6s. and 9s. per dozen.

FREESIAS.

The chaste and fragrant flowers of these beautiful Cape bulbs render them of the greatest value for decorative purposes, especially where cut flowers are required during the winter months; they grow about 9 inches high, producing 6 to 8 flowers, the fragrance of which is most delightful. They can be easily forced, and should be planted 6 to 12 bulbs in a pot.

IRIS.

ENGLISH (I. anglica or Xiphioides).

For brilliancy of colour and fine vigorous foliage the English Iris takes rank amongst the handsomest of flowering bulbs. They greatly resemble the Spanish Iris in style of growth, attaining a height of about 2 feet, and produce, during June and July, a succession of large and beautiful flowers.

AMARYLLIS.

This deservedly popular family cannot be too highly recommended. The ease with which they are cultivated and the gorgeously beautiful flowers they produce at almost any season, make them most desirable in any collection. By gradually drying the bulbs they can be put to rest at any time during the year, and then when required, if started in a gentle heat they quickly develope their large Lily-like blossoms, which are of various colours, generally embracing crimson, white and red, scarlet, rose-flaked, striped white and crimson, with various shades of colours.

BEGONIA BALMISIANA.

This very distinct Begonia has been imported from Mexico. It is a handsome flowering bulbous species and freely produces quantities of large and attractive flesh-coloured flowers of good substance. The succulent stems are dark-red in colour, the leaves being thick and fleshy, with dentate margins. *3s. 6d.*

BEGONIA GLOIRE DE SCEAUX.

A new hybrid winter-flowering bulbous variety, raised between *B. socotrana* and *B. subpetala*. The plant is of compact habit and most proliferous, the flowers being well shaped and of a beautiful bright rose colour. The glabrous leaves are cordiform and of a dark metallic green. Flowering as this does from the beginning of January to the end of April, it will be found a very desirable acquisition to our winter-flowering plants. *10s. 6d.*

BEGONIAS.

VARIEGATED-FOLIAGED SECTION.

Selections of good varieties made by Mr. W. B. at 30s. 42s. and 60s. per dozen.

For descriptions and prices, *vide* Mr. W. B.'s Plant Catalogue.

NEW AND CHOICE ACHIMENES.

VIOLETTA, a very pretty and free-flowering new variety of vigorous growth, producing an abundance of rich violet-purple flowers, the centre of each lobe and the mouth of the throat being very darkly veined. *6s.*

Good selections made at 6s., 9s. and 12s. per dozen, according to sorts.

New and choice sorts, 18s. and 30s. per dozen, according to sorts.

GESNERAS (NÆGELIAS).

The value of Gesneras as decorative plants can scarcely be over estimated. Most of them have rich velvet-like foliage, which, in the respective kinds, varies from green to crimson. If only grown for the foliage they are very attractive, but they produce splendid pyramidal spikes of blossom, which are extremely handsome. Originally, however, the principal colour was orange-scarlet; now, as the result of fertilisation, there are various colours and shades, added to which the spotting on the flowers of some of the varieties is extremely pretty. Selections of good varieties at 30*s*. and 42*s*. per dozen, according to sorts.

GESNERAS, see also page 25.

NEW AND CHOICE GLOXINIAS.

The handsome and showy flowers of these beautiful bulbous plants, render them of the greatest value for the decoration of Stoves and Conservatories. Of easy culture, they can, with judicious treatment, be had in bloom at almost any season of the year, their attractive flowers being of large size and good shape, admirably adapted for cutting. The colours are most varied, every hue being pure and distinct, while some of the kinds are spotted and maculated in a most pleasing manner.

Choice selections made by Mr. W. B. at 18s., 30s. and 42s. per dozen, according to sorts.

GLOXINIA INSIGNIS, this distinct variety produces its flowers during the autumn and winter; colour bluish lilac, marked with a large crimson blotch at the base of the tube. 2*s*. 6*d*.

MACULATA SCEPTRUM, a magnificent hybrid, with extra large erect cordate foliage; it produces a rigid terminal inflorescence, exceeding 20 inches in height, which bears majestically its large, clear lilac, well-formed blooms. 2*s*. 6*d*.

TYDÆAS.

These can be cultivated so as to produce an abundance of bloom throughout the winter, their flowering season principally depending on the time of year their tubers are started into growth. With a little management a succession of blooming plants can be had nearly throughout the year. 18*s*., 24*s*., 30*s*. and 42*s*. per dozen, according to sorts.

SEED FROM PRIZE STRAINS.

PRIMULA  SINENSIS.

PRIMULA SINENSIS FIMBRIATA MONT BLANC.—Unrivalled in the pureness of its snowy white, densely fringed flowers, which are of great size and substance. 2*s.* 6*d.*

PRIMULA SINENSIS FIMBRIATA SPLENDIDA.—The flowers of this magnificent strain are a deep crimson, beautifully fringed, and of immense size and substance. 2*s.* 6*d.*

Mr. W. Bull has great confidence in offering the above unrivalled strains of Chinese Primulas. They are unsurpassed in the great breadth and substance of their beautifully fringed flowers, which are borne in immense heads, growing well above the foliage. They are of fine habit, and can be highly recommended.

PRIMULA SINENSIS FIMBRIATA ALBA
PRIMULA SINENSIS FIMBRIATA RUBRA
PRIMULA SINENSIS FIMBRIATA FILICIFOLIA ALBA
PRIMULA SINENSIS FIMBRIATA FILICIFOLIA RUBRA
} Extra choice.

These varieties possess most elegantly fringed edges, and are offered with the greatest confidence. 1*s.* 6*d.* and 2*s.* 6*d.* per packet.

PRIMULA SINENSIS FIMBRIATA "Bull's Premier Mixture." 1*s.* 6*d.* and 2*s.* 6*d.*

Seed of Mr. William Bull's select strain of this useful and favourite plant is now offered in mixture containing all the new and most distinct colours and varieties; the many unsolicited testimonials received point conclusively to the fact of its being appreciated among growers as of unusual excellence. To distinguish this from the ordinary mixture of *P. alba* and *rubra* generally supplied, Mr. W. B. designates this choice mixture as above.

PRIMULA SINENSIS FIMBRIATA KERMESINA SPLENDENS.—A fine variety, with rich crimson-coloured flowers. 1*s.* 6*d.* and 2*s.* 6*d.* per packet.

PRIMULA SINENSIS FIMBRIATA STRIATIFLORA.—White striped with rosy carmine; splendid variety. 1*s.* 6*d.* and 2*s.* 6*d.* per packet.

PRIMULA SINENSIS FIMBRIATA ALBA FL. PL.
PRIMULA SINENSIS FIMBRIATA ROSEA FL. PL.
PRIMULA SINENSIS FIMB. KERMESINA SPLENDENS FL. PL.

These double Primulas are a valuable acquisition, especially to cut from, as they do not drop their flowers like the single varieties. 3*s.* 6*d.* and 5*s.* per packet.
